

Mobile job management software for civil engineering

Schedule 

Capture 

Track 

Invoice 

Report 

Get complete project control by connecting the workflows and processes involved in civil engineering with Re-flow's mobile job management software.

Our desktop dashboard gives you powerful job command functionality, and in the field, our ultra-stable app won't let you down.

As your workers complete tasks and information, data comes back to the dashboard, instantly highlighting what's been accomplished.

"Our gangs have really adopted Re-flow's technology. They have embraced it for our data transfer of health and safety information, site inspections and also in return, they send us information through the app by taking photos on-site of any problems, completing their timesheets, daily records and diaries, so that everything is saved in one location."

Simon Masterman, Project Manager, Bridge Civil Engineering

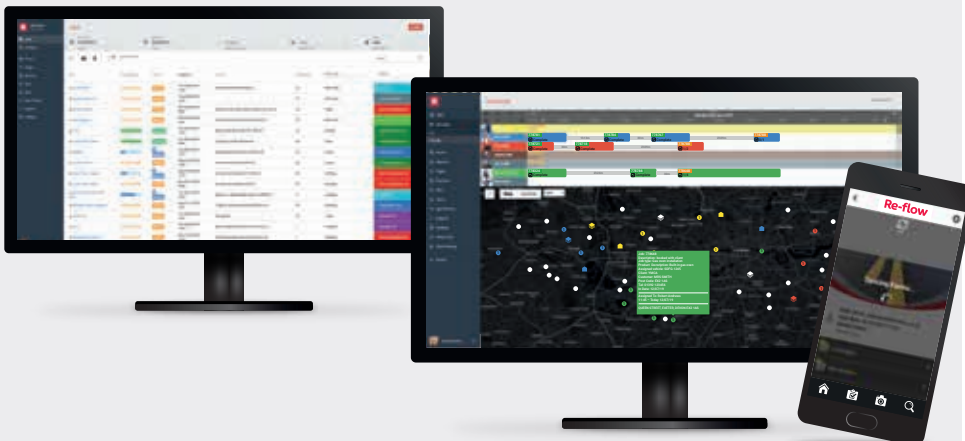

Features

Jobs and tasks

- Create jobs and tasks on the dashboard, add instructions, checks, policies and protocols. See current status of progress in real-time.
- Smart Sync all forms, plans and project documentation to mobile devices and instantly update if plans change.

Schedules and maps

- Assign map locations in the dashboard to reduce operative travel time, increase productivity and reduce travel costs.
- Drag, drop and assign all activities in the scheduler.
- Pick up existing jobs or routes and swap them between people to accommodate changes in schedules.

Benefits

- Custom configure your set-up, so Re-flow software can deliver the flexibility you need to be in control of your operations and processes.
- Reduce time spent on paperwork and compliance documents to save money by creating site and task specific forms using your own terminology.
- Stick to schedules, communicate better and improve overall job quality, productivity and profitability with instant connections and real-time dashboard overview of your entire workflow.
- Take control of the information exchange and ensure processes are followed, reports are returned and tasks are signed off.
- Instant evidence of your compliance for all business stakeholders and regulatory authorities. Robust reporting for even the most stringent audits.
- End to end financial management from inbuilt calculators that feed into bill of quantities (BoQs), quotes and invoices. All integrated with major accounting platforms.

“Defect reporting increased by 90%, enabling Toppesfield to spot small problems that are identified by their defect sheets before they become big expensive problems.”

Sam Hennessy,
Business Improvement Manager,
Toppesfield

Forms

- Integrate any form from site diaries to SHEQ, that auto-adapt in each job based on the information being inputted, so your operatives don't waste time or miss vital information.
- Forms work completely offline and save as you go. On submission, forms are stored until a connection is established and then immediately available to view in the management dashboard.

Photos and Scanners

- Take photographs, mark-up and add measurements to eliminate confusion.
- Use the app to scan and record items with barcodes and QR codes straight into forms

Sign and tag

- Auto-tags completed forms with time, date and GPS.
- Electronically sign, submit and store forms for compliance.

Quote and Invoice

- Pull through all required information from materials and plant to the correct client addresses and logos to create quotes.
- Instantly manage the status and approve as invoices to reduce the time it takes for clients to pay.

Returns and Reports

- Enforce checks, policy and process adherence, then see what is missing or incomplete.
- Export all reports such as staff or financial information including which vehicles or plant is requiring the most frequent or costly maintenance to help decision making on asset write down.

Data and system security

Our security processes include:

- Redundant firewalls
- Quarterly vulnerability scans
- Disaster Recovery
- Advanced Proactive Uptime Monitoring
- Server maintenance and OS Patch Updates
- Server admin access is restricted to our office static IPs and all staff laptops are encrypted.

Our software platform and your data is hosted by UKFast and our servers are backed up multiple times per day on a 30-day retention. UKFast guarantees 100% network uptime and comes with the following certifications in the ISO certified, UK owned data centre complex in the UK:

- ISO 27001, 27018, 22301, 9001, 14001
- PCI DSS Level 1 Service Provider
- Cyber Essentials +
- BSI PAS 2060: Carbon Neutral
- CISCO CMSP
- G-Cloud 10
- PAS 2060 carbon neutral hosting.
